Overview

Welcome to the Ensoniq ASR Library

Thank you for purchasing the Ensoniq ASR Library. This sound set is a Kontakt library and requires the free Kontakt Player (<https://www.native-instruments.com/>) the full version of Kontakt, Komplete, or Maschine. Please see Getting Started for installation details.

Ensoniq sound engineers produced a collection of Compact Discs “CDR 1 – 4 Series” consisting of the factory content. These sounds were used to create the EPS (Ensoniq Performance Sampler), Ensoniq TS-10, and ASR sample libraries. Thousands of floppy discs were transferred to CD’s and allowed the hardware samplers to load sounds directly from CD-Rom drives. This was a large step forward for musicians and made it easy to access large collections of sound libraries.

Digital Sound Factory has assembled these classic sound libraries for use with modern software vst synthesizers. The Ensoniq ASR is designed for Kontakt Player and the full version of Kontakt. The instruments are seamlessly integrated to be controlled by all Native Instruments NKS hardware.

Kontakt View

Functionality

Main Panel

Main Toggle Button - A/E/I - B/F/J - C/G/K - D/H/L

The Main Panel includes a toggle button that controls what screen is active. The toggle advances between the A-D, E-H, & I-L controller groups.

The effects toggle button switches between the effect types. The red LED indicates the active set of controls.

A-D Filter - Tone, Presence, Shape, Image

E-H Amplitude Envelope - Attack, Decay, Sustain, Release

I-L Keyboard/Effects – Dyn 1, Dyn 2, FX A, FX B

Volume Control

The master volume of the instrument.

A-D Controls

Tone - Filter - Filter cutoff amount

Presence - Resonance amount.

Shape - Filter Envelope Amount

Image - Stereo image

Effects Button

Activates effects settings.

Solo Button

Activates solo settings.

Amplifier Envelope Panel

E-H Controls

- Attack - Amplifier attack time
- Decay - Amplifier decay time
- Sustain - Amplifier sustain time
- Release - Amplifier release time

Keyboard/Effects Amount Panel

I-L Controls

- Dyn 1 - (Dynamic 1) Velocity to Amplifier
- Dyn 2 - (Dynamic 2) Velocity to Filter Cutoff
- FX A - Reverb Send
- FX B - Delay Send

Effects Controls

Effects Reverb Panel

Effects Toggle Button

The effects toggle button switches between the effect types. The red LED  indicates the active set of controls.

Reverb: Predelay - Size - Stereo - Amount

Delay: Feedback - Time - Pan - Amount

Chorus: Depth - Speed - Unit - Amount

Reverb Controls

Predelay - Time between the end of the initial sound and first reflections.

Size - Room size.

Stereo - Positioning of reverb reflections.

Amount - Amount of reverb signal.

Effects Delay Panel

Delay Controls  Feedback - Delayed signal sent back to the delay line

Time – Tempo synced. Separates the frequency of delay signals.

Pan - Positioning of the delay signal

Amount - Amount of delay signal

Effects Chorus Panel

Chorus Controls

- Depth - Amount of pitch modulation
- Speed - Frequency of the pitch modulation
- Unit - Separation of the pitch modulation
- Amount - Amount of chorus signal

Solo Controls

Solo Panel

Solo Controls

- Solo - Solo mode off/on
- Legato - Legato mode off/on
- Glide - Glide off/on
- Rate - Glide rate

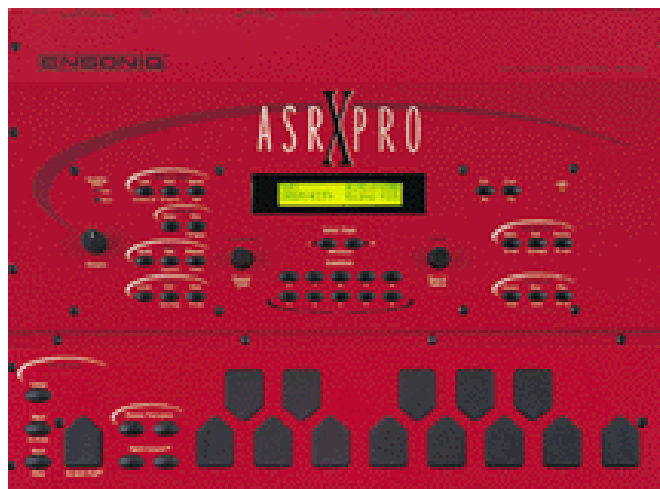

NKS Compatibility

Designed for Komplete Kontrol Hardware and Software

The Ensoniq ASR library is designed to work with all NKS hardware enabled products. NKS seamlessly integrates the hardware and software allowing control in both directions. Software parameters are displayed on the hardware and mapped to the controllers. Sounds are tagged with category names to quickly locate the desired sound.
